## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Van Wagner, US. Pub. No. 2005/0078195, in view of Smetters et al., U.S. Pub. No. 2004/0266449.

Regarding claims 1-31, Wagner discloses a method for transmitting surveillance image data over a wireless network comprising: associating an identification (reads on MDRS unit ID) with a surveillance device (i.e., MDRS); and transmitting said surveillance image data (reads on MPEG data stream) and said identification (MDRS unit ID) to a mobile telecommunications switching station (reads on control monitoring system) (page 3 [0039-0049]).

Wagner does not explicitly disclose an *authorized* identification.

In a similar field of endeavor Smetters discloses provisioning secure wireless sensors (i.e., authenticating a prospective member device with a credential) (see page 3 [0045-0046] and page 4 [0051]).

At the time of the invention it would have been obvious to one of ordinary skill in the art to modify Van Wagner to disclose an authentication for a MDRS unit for the

purpose of securing wireless access points that provide data which needs to be securely transmitted (see Smetters page 2 [0024]).

***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Monroe, U.S. Patent No. 6,392,692, discloses a network communication techniques for security surveillance.

Rylely et al., U.S. Pub No. 2004/0132489, discloses wireless multi-handset telephone system with integrated video monitoring accessories.

Paul, U.S. Pub. No. 2004/0171371, discloses an automatic camera image transmittal system.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joy K. Contee whose telephone number is 571.272.7906. The examiner can normally be reached on Monday through Friday, 5:30 a.m. to 2:00 p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Marsha Banks-Harold can be reached on 571.272.7905. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
